Europaeum Mission

The Europaeum is an association of seventeen (as of 2020) European leading universities. Founded in 1992 by Oxford University, and on the vision of Lord Weidenfeld, the Europaeum brings together talented students and faculty working in the Humanities and the Social Sciences, to promote a better ‘sense of Europe’ through collaboration and academic mobility. We believe that today, we need more not less international collaboration, more not less emphasis on universities engaging with the wider society, and more not less connection between the disciplines. And we believe that fresh cohorts of talented young people, committed to making a difference for the better, are essential to shaping the future of Europe for the better.

For 27 years, we have successfully encouraged collaboration between European research universities, facilitated tripartite dialogue between academics, students, and those working in the public and private sectors, and we have contributed to European-wide debates about culture, politics, and society. We have established excellent faculty collaboration and student exchange; we have earned a reputation for organising strikingly successful student Spring and Summer Schools, public debates, seminars, joint teaching programmes, lectures and workshops; and we run high quality linked scholarship schemes.

Overview 2020

In 2020, the second cohort of the Europaeum Scholars Programme started their journey, albeit somewhat disrupted by the Covid-19 crisis which made it necessary to hold modules online. Core activities have also been impacted, with some postponed to 2021 (Classics Colloquium and Summer School), and a delayed Spring School taking place on Zoom. Much effort went into facilitating homeworking and online events and any time gained was used to continue work on our Alumni network as well as prepare for a new website in 2021. In October, Dr Marcin Walecki took up the position as Director in a full-time role, Dr Hartmut Mayer moved to the role of Executive Chair, and Dr Andrew Graham became a Trustee.

The Europaeum Masters Programme in European History and Civilisation offers graduate students a special opportunity to deepen their knowledge of European history and institutions, their philosophical and historical backgrounds and underpinnings, and their social and economic contexts, through the lens of three different university worlds. This knowledge plays an increasingly crucial role in practical decision-making and strategic planning, where Europe-wide and global contact and negotiation is required. Students spend a term each in Leiden, Paris and Oxford.

In 2020, physical presence of students in Oxford was made difficult by the Covid-19 crisis. Some completed their degree in Leiden, some opted for an online Oxford term and some postponed their studies to the autumn.

This joint master's degree is offered by Charles University as leading partner (Prague), plus Jagiellonian University (Krakow), Leiden University and Pompeu Fabra University (Barcelona), with the help of Erasmus Mundus funding. It is a two-year programme that starts in Prague and subsequently offers different options. Students will receive a Europaeum Certificate and some will be invited to attend the Spring School in Oxford in their second year.

MA VACLAV HAVEL

This is a specialisation offered to master's students at Charles University (Prague), Leiden University and Paris I (Sorbonne) who can spend one semester at one partner university.

Growing network of the Václav Havel Scholars

Report by Anna Lukešová

In Prague, the Charles University's Alumni of the Václav Havel Programme gathered to remember five years since the first university exchange of the Václav Havel Scholars. During this time, Charles University in Prague sent eighteen students for an exchange at Université Paris I Panthéon-Sorbonne or Leiden University, with two other students completing their second year of the programme at present. This numerous group thus created a great team of friends who meet actively even after years.

The Václav Havel Programme gained its name after the prominent personality of the Czech ex-president Václav Havel. The programme was launched in the academic year of 2012/2013 by a trio of the Europaeum member universities: Leiden University, Université Paris I Panthéon-Sorbonne and Charles University in Prague. It is designed as a complementary two-year programme for Masters’ students of the three partner universities who focus their studies on European issues. The Václav Havel Scholars enjoy not only a one-semester exchange at one of the partner universities of the programme, but they also participate in the Oxford Spring School where they can meet with students from other member universities of the Europaeum association or students involved in other Europaeum programmes, such as History & Civilisation or European Politics & Society.

Conference
Life outside the Euro – Monetary and Financial Issues for the EU periphery and beyond

EuPEP, together with SEESOX and the ESC convened a conference on “Life Outside the Euro: Monetary and financial issues affecting the EU periphery and beyond”. Much research on EU integration looks at the “core” EU countries, and analyses the speed and priorities for taking forward the European project. This conference recognized that “one size does not fit all” within the EU context, and that prematurely fitting all member states with the same shoe may undermine the stability not only of that member state but also to EU as a whole. There are trade-offs for member states as to when and if to join the euro, and whilst they are outside the euro whether to join the banking union. The conference examined these issues, as well as two other issues of importance to some of these countries: the future of the Vienna Initiative and the framework of macroprudential policies in the EU as it affects countries outside the core. This conference was open to the public and the Europaeum was a cooperating partner for this event and recruited participants from within the Europaeum network.

China in Europe: Economics, Political and Geo-strategic challenges

In an era of increasing economic interdependence China is playing a growing role in the global economy, including in Europe, which presents both opportunities and challenges. This conference aimed to analyze the different dimensions of an increasingly assertive Chinese presence in Europe from Economics to Politics and Geo-strategy.

The seminar invited 25-30 students and leading experts to reflect on China’s Belt and Road initiative, the ‘Made in China 2025’ plan, the China 17+1 initiative and Trade disputes between China, the US and Europe. Other questions that were looked at included technology competition and critical infrastructure investment.

The event took place in Portugal — one of the most exposed European economies to Chinese investment - , in the Royal Building of Mafra (25km from Lisbon), which has recently been distinguished as a World Heritage Site by UNESCO.

“Very well organised. It’s perfect that they’d let students express their thoughts, and it wouldn’t be like a conference where you sit down and listen. It was a truly European debate … It was very valuable to hear various opinions about the same political events, and I found some people with similar research topics or methods to mine that I could consult with.“

The EU and the Balkan region: the state of play

With Croatia’s accession to the EU in December 2011, the EU signalled to the other states of the Western Balkans that accession to the EU would be possible if they reformed accordingly and converged with basic European values. But instead of convergence, the EU and the Western Balkans are growing apart. This means that the Balkan region remains a major political construction site - economically, culturally, ethnically and historically highly complex, with very different expectations of the EU.

In addition, the region faces problems of illiberalism, democratic backsliding and corruption practices. Some countries in the region seem far from being able to meet the requirements of EU accession in the near future. Other challenges which are relevant in the region include: Sustainability and economic growth; Connectivity; Security and geopolitical challenges; the EU Enlargement policy; Regional demographics and brain drain

On the occasion of Croatia’s EU Presidency, during the first semester of 2020, United Europe and the Europaeum invited 25 Young Professionals as well as students from the Europaeum Network from all over Europe to Zagreb to discuss the following issues:
- What are Croatia’s goals in its EU Presidency?
- What about corruption, democracy and media freedom in the Balkan countries?
- What influence does China have in the Balkans with its Belt & Road initiative? What does this mean?
- How does the role of Russia in the region affect stability?
- What are the causes of the divergence between Western and Eastern Europe?
- Are solutions conceivable to overcome the division and promote the integration of the whole of the Balkan region into the EU?

Spring/Summer School
(originally planned as Spring School in Oxford April 2020)

Europe in the World – the World in Europe

For the last five centuries it has been perceived that Europe was the main influence on major world developments through its formal and informal colonial and neo-colonial power. In the last fifty decades or so, however, it could be argued that the greatest influence on the state of Europe itself has come from the world outside. Influences from the outside have not only affected the political agenda in most of Europe’s countries, they also have had profound social and cultural impact. Europe is also greatly affected by the economic consequences of globalisation.

This Spring School will bring together post-graduate researchers, mainly but by no means exclusively, in Humanities and Social Sciences discussing the wider impact of the world on Europe and of Europe in the world in a historical and contemporary context. Issues that will be explored include topics such as migration, economic investments in Europe and security challenges stemming from external instability, but the participants are also actively invited to challenge the notions underlying this simple dichotomy and provide alternative readings of how interdependence in the world has developed over the last centuries and how that affects the current state of Europe.

“**The interest of others in my topic is a great motivation ... Organization was on a top level! Great job! ... I found the key lecture of day two quite fascinating. I think it was because of the moderator's acute questions, the relevance of the topic for today's world, and the high quality of the speakers.**”

**Shortened report by the convenor, Dr Gabriela Frei**

The theme of the Summer School ‘Europe in the World – The World in Europe’ offered many opportunities to engage with Europe’s position in the world in the past, present, and future: How does or did Europe influence other parts of the world, how does or did the world impact Europe, and how does the world affect the current state of Europe? Student papers covered a variety of research areas, such as Europe’s Engagement with the Islamic World; Cultures and Performances of Identity; European Identities and the Movement of People; Europe in the World: Geopolitical Shifts Present and Future; and the Future of Europe. Panels were grouped around these sub-themes.

An overview of the lectures and student presentations can be seen above, showing the breadth of the conversations and papers in this event.

Topics of individual group discussions covered aspects of European identity; the foundations of European politics; the role of European history; the idea of Europe; geostrategic challenges for Europe and how the EU and European countries deal with the current health crisis, and how Covid-19 affects thinking about Europe and the World.

Despite the challenges a virtual event naturally poses, and the lack of in-person opportunity of intellectual exchange, all participants were highly motivated and involved, and the feedback received confirms that the students’ academic research benefitted from their participation. This was the first “core activities” event that the Europaeum held in a virtual format. It worked extremely well. Feedback on various features (length of breaks/sessions etc) will be taken on board for future events.

During summer 2020, the Europaeum teamed up with the Blavatnik School of Government (Oxford) for a summer project that formed part of the degree requirement of three of their master’s students who found themselves unable to embark on their summer internships due to Covid travel restrictions. Two former Europaeum Scholars were added to a small research team to produce this invaluable report, conducting a big survey, holding interviews and doing a lot of research within the Europaeum member network to find out more about the universities’ response to the coronavirus crisis and the impact on students. Even though the final version of the report was only ready in October, it still formed a very useful overview of the enormous impact the coronavirus outbreak had on universities and their students and it remains to be seen what the long-term consequences are on all levels.

The prime aim of the Europaeum Scholars Programme (launched in 2018) is to engage academic thinking with policy making and to produce a new generation of leaders, thinkers and researchers with the capacity to meet the cultural, political and societal challenges facing Europe today.

Scholars attend eight modules, taken over two years, alongside their existing degrees. Being multi-locational and multi-institutional the programme draws upon the resources of all the Europaeum university members. Teaching is by Europaeum affiliated academics together with a wide range of external experts and leading thinkers. Scholars visit key European and international institutions where they learn about how they function in conversation with practitioners and policy makers. There are opportunities to directly engage with people facing some of the most difficult circumstances in contemporary society. By the end scholars emerge with knowledge and a set of skills and contacts equal to any group anywhere.

At its core, the Scholars programme involves multidisciplinary team work engaged in problem solving within the context of contemporary Europe. Scholars work intensively in small groups on a policy project that they identify, design and develop under the guidance of a mentor. Each team’s policy recommendations are judged by a panel of external experts, and there is the potential for publication of the best.

Each student is fully funded by a scholarship worth €10,000 per annum for two years. This covers full accommodation, travel, food and all tuition. A maximum of 30 places was available for the first cohort.

**BENEFITS INCLUDE**

- **Learning** – how to collaborate in a multidisciplinary team
- **Developing** – key leadership skills for success in the public or private sectors
- **Networking** – with scholars and academics from leading European universities
- **Hearing** – from a range of professionals involved in shaping policy in Europe
- **Experiencing** – several other European universities in addition to your own
- **Training** – that utilises the best professional and doctoral training schemes
- **The ability** – to ‘stand out’ in the increasingly saturated job market for graduates.

The Europaeum Scholars Programme offers a unique opportunity to be part of a network of some of the brightest people of your generation. Scholars are able to connect their doctoral research with the world of policy making, to draw on the combined resources of more than a dozen of Europe’s leading universities, to learn how to work as a team (and what leading a team involves), and to understand the complexity of policy making. They will learn more about themselves.
European Scholars are people who “think for themselves, but not just of themselves”. They are people with the capacity and the desire to create a better future for Europe, who combine academic excellence with a clear commitment to promoting the public good. Highly motivated and well organised they will have a strong interest in connecting the lessons that can be learned from academic research to the public arena.

Bursaries

In 2020, none of the Europaeum bursary recipients could embark on their study trips and every effort is made to postpone these to the next available opportunity in 2021. Full bursaries will continue again in 2022.

The Europaeum offers three bursary schemes, with Charles University, Prague, The Graduate Institute in Geneva and the University of Helsinki. For each of these, one student from Oxford and one student from the partner university spends 3-4 weeks in the other place, in the format of a self-directed study/research trip.

Bursary reports of successful applicants are available on our website.
The Trustees of the Europaeum are delighted to announce the appointment of Dr Marcin Walecki as full time Director of the Europaeum with effect from 1 October 2020. In conjunction with taking up this post, Dr Walecki will become the first Europaeum Visiting Fellow at St Antony’s College, Oxford.

Lord Patten, Chancellor of the University of Oxford and Chair of the Trustees, commented “I am extremely pleased that Dr Walecki will be joining the Europaeum. He brings extensive experience of different European countries and his deep commitment to democratic values and to the importance of tolerance and freedom of expression chimes particularly well with the current concerns of Europe and its leading universities.”

Dr Walecki said “Given the strains and stresses facing Europe, the Europaeum is needed more than ever. Universities need to engage more with what’s going on in society and to work together across boundaries and disciplines. Europe and its citizens have to grow closer again, and universities can play a major role in this process. I am greatly looking forward to building on what has already been achieved”.

Dr Marcin Walecki was previously Head of Democratization Department of the OSCE Office for Democratic Institutions and Human Rights. He has over 20 years of democracy assistance and governance experience working in more than 50 countries around the world. He holds a DPhil in Politics from St. Antony’s College at Oxford University and a master’s in Law (Hons, Class I) from the University of Warsaw. Among numerous executive and advisory roles he has held include being an Executive Director of the European Partnership for Democracy (Brussels), Senior Advisor to the International Foundation for Electoral Systems (IFES, Washington DC) and a Board Member of the School of Leaders Association (Warsaw). He was also a Max Weber Fellow at the European University Institute in Florence. As an academic, he has a strong interest in democratic governance and political corruption.
